Are you JOB-Ready?
Our high-tech company is here to help.

UpScale talent program...
- In your last semester (February 1st to June 30th) each and every month (five times per month) without any commitment*
- You get opportunity to learn the essential practical skills (not theoretical text books) of Java, Scala, Akka, Microservices, Docker, Kubernetes, Kafka, NoSQL databases, Cloud technologies, Artificial Intelligence, Machine learning...
- The company provides guided tours of its Agile working practices (such as, Stand-up ceremony, Refinement, Demo, Grooming, Retrospective)
- You get tickets to join professional webinars, organized for highly skilled IT experts
- Senior engineers of UpScale answer your questions about the latest technologies

To get in, we have four contact points in each and every month during the 5 months period (as well together).
In addition to these, you can subscribe to a dedicated Slack channel of the company and participate in UpScale charity events as a volunteer.
No worries, you can give up if it exceeds your capabilities, so you can quit anytime. But if you complete the program, you can prove your skills by solving a complex problem and you receive your job offer in guaranteed.
In any case, your skills will match with the market requirements for sure.

What we offer our employees:
- Incredible things every day, access to the latest technologies, opportunity to continuously learn and grow, create value and build something
- Flexibility / Home office, Autonomy, no micromanaging
- Cool work environment with lots of fun, belonging to a young, engaged team, social life
- Daily support and feedback, coaching
- Competitive salary and Cafeteria system with wide variety of benefits (e.g. COVID test, Private health care, Saving, Extra day-offs, etc.)
- Opportunities to contribute to the society in the frame of the company’s Corporate Social Responsibility programs

You can also apply for our 2 x 4 weeks internship program if you are ready to be an engaged, proactive member of our team. In return, the company provides you with an incredible on the job learning opportunity.

About UpScale
UpScale is more than a technology company to work for.

We believe, that all of us need to do something to stop or slow down the climate change. For this reason, we have a paperless office and many of our employees use hybrid/electric cars. We also provide dedicated bike parking spots with private showers for our colleagues. We want to make the world a better place, so we donate and collaborate with the selected thing, one of the most credible international charity organizations.

We are not just highly skilled cool technology professionals, but we are People, who support each other professionally and privately, regularly meet and involve everyone.

We work together with market leader top banks and other players of other industries with extensive international ambition and help these large multinational organizations to successfully integrate the latest technologies onto their enterprise architecture.

We are not just highly skilled cool technology professionals, but we are People, who support each other professionally and privately, regularly meet and involve everyone.
